

EVENTFUL EDUCATION PROGRAMS

STEM & STEAM PROGRAMS BROUGHT TO YOUR SCHOOL

Eventful Education programs are developed to enhance retention of subject matter. Students are encouraged to use creativity, imagination, critical thinking, communication, and collaborative skills as they partake in hands-on activities, challenges, experiments, building exercises, & crafts. We teach science, history, literature, engineering, coding, math and other STEM concepts in an out of the box way to perk the interest of students! Once we have their attention, the inquisitive nature of the students comes alive as we integrate real-life applications, meaningful instruction and materials that drive excitement, ingenuity, interest and enhanced interaction.
